Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

In reference to claim 1 and 26 and dependent claims, although Goldreich teaches a signature scheme that generates points from a lattice structure, Goldreich does not teach a function that maps the message to a point on a grid.

In reference to claim 12 and dependent claims, although Goldreich teaches a signature scheme that generates points from a lattice structure, Goldreich does not teach finding a point "y" of a key lattice that is not the same as the auxiliary lattice.

In reference to claim 19 and dependent claims, neither Goldreich nor Diffie Hellman do not teach determining whether a distance between the points is related to a predetermined distance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
